Antler Boost ATTRACT™

was formulated to draw deer in without the use of whole corn, cracked corn, or rice bran which are ingredients in most attractants. Those ingredients draw in non-target animals such as raccoons, squirrels, turkeys, hogs, and bears. Why spend wasted time and money attracting non-target animals? Don't feed the local critter population – ATTRACT™ your deer herd.

ATTRACT consists of whole grains, vitamins, minerals, and our proprietary attraction dust mixture. The attraction dust mixture contains one ingredient that has an enhanced form of fat that is like a magnet for deer. A sweet apple flavor increases attraction via wind and smell. The fat level is set high to get them running in without the use of whole corn, cracked corn, or rice bran. You can pour ATTRACT out anywhere – you do not need a feeder but perfectly okay to use a trough feeder (gravity and spin feeders not recommended).

ATTRACT can be fed any time of year and is designed to attract deer and provide a maintenance level of protein along with high fat and carbohydrates. If you want a product to increase antler growth with power packed by-pass protein and direct delivery amino acids, check out our GROW formula for Spring and Summer feeding.

INGREDIENTS:

WHOLE GRAINS, PLANT PROTEIN PRODUCTS, GRAIN BY-PRODUCTS, ZINC SULFATE, MANGANESE SULFATE, COPPER SULFATE, COBALT SULFATE, SODIUM SELENITE, FERROUS SULFATE, COBALT CARBONATE, CALCIUM IODATE, VITAMIN A ACETATE, VITAMIN D3 SUPPLEMENT, VITAMIN E SUPPLEMENT, APPLE FLAVORING

FEEDING DIRECTIONS

Pour contents of bag in a single spot on the ground along travel corridors and well-used trails. Allow feed to pile up in the shape of a pyramid as you pour out which will keep moisture away as much as possible. Also, do NOT clear off leaves and debris to expose dirt, as the leaves and debris will act as a barrier to moisture. ATTRACT can handle rain and moisture but taking smart steps to minimize moisture is always best. Always follow your local game laws when feeding ATTRACT.

Make sure to put a camera on your ATTRACT feeding location to see what is eating it and note that ATTRACT is formulated with ZERO whole corn, cracked corn, or rice bran so you will see less non-target animals eating it such as raccoons, squirrels, turkeys, hogs, and bears. Do not feed to breeder deer in a very small pen – contact us direct if you are interested in a small pen formulated product. Do not feed to sheep as there is copper mineral in this mixture that is very healthy for deer but sheep should not be fed copper.

GUARANTEED ANALYSIS:

Crude Protein: Min 10%
Crude Fat: Min 10%
Crude Fiber: Max 25%
