Net WT 10 LBS (4.536 KG)

Antler Boost GROW™

was formulated to provide your deer the same amount of crucial antler growing nutrients as 300 lbs of common deer protein pellets. We are able to do this through the inclusion of direct delivery amino acids. Amino acids are the nutrients inside of protein that enable antler (and all other) cells to grow. Antler Boost works with a high tech company that concentrates these critical amino acids into our GROW formula. We also include high by-pass protein roasted soybeans, kelp, vitamins, chelated minerals, cinnamon, garlic, yeast culture, and our proprietary attraction dust mixture to finish the powerful GROW formula.

The reason for this concentrated textured feed supplement is simple - your deer need every bite of supplemental feed to be power packed while being cost effective. With 300 lbs of common deer pellets costing over \$60, you can feed your deer for under half that cost. Another huge advantage is you can pour GROW anywhere - you don't need a feeder, but it is perfectly okay to use a trough feeder (gravity and spin feeders not recommended). This allows you to feed and grow those 7 and 8 year old and older deer that will no longer come to a feeder - **just pour it out and watch them GROW!**

INGREDIENTS:

ROASTED SOYBEANS, PLANT PROTEIN PRODUCTS, GRAIN BY-PRODUCTS, DIRECT DELIVERY AMINO ACID BLEND, KELP, CINNAMON-GARLIC SUPPLEMENT, YEAST CULTURE (SACCHAROMYCES SEREVICIAE), YUCCA SCHIDIGERA PLANT EXTRACT, DRIED LACTOBACILLUS ACIDOPHILUS FERMENTATION PRODUCT, CALCIUM CARBONATE, ZINC AMINO ACID COMPLEX, MANGANESE AMINO ACID COMPLEX, COPPER AMINO ACID COMPLEX, COBALT AMINO ACID COMPLEX, SODIUM SELENITE, FERROUS SULFATE, COBALT CARBONATE, CALCIUM IODATE, VITAMIN A ACETATE, VITAMIN D3 SUPPLEMENT, VITAMIN E SUPPLEMENT, VITAMIN B12 SUPPLEMENT, APPLE FLAVORING

FEEDING DIRECTIONS

During Spring and Summer, pour contents of bag in a single spot on the ground close to bedding areas, on edge of food plot, or at established feeding sites. Allow feed to pile up in the shape of a pyramid which will keep moisture away as much as possible. Also, do NOT clear off leaves and debris to expose dirt as the leaves and debris will act as a barrier to moisture. GROW can handle rain and moisture but taking smart steps to minimize moisture is always best. Always follow your local game laws when feeding GROW.

Make sure to put a camera on your GROW pile to see what is eating it and note that GROW is formulated with ZERO corn or rice bran so you will see less non-target animals eating it such as raccoons, squirrels, turkeys, hogs, and bears. Do not feed to breeder deer in a very small pen - contact us direct if you are interested in a small pen formulated product. Do not feed to sheep as there is copper mineral in this mixture that is very healthy for deer but sheep should not be fed copper.

GUARANTEED ANALYSIS:

Crude Protein: Min 20%

Crude Fat: Min 12%

Crude Fiber: Max 25%
